## **FOR IMMEDIATE RELEASE**

### **Community Bank donates to Treasure Village Montessori**

July 2009- Community Bank of Florida was pleased to partner with Treasure Village Montessori School to help a classroom purchase a "Smart Board." Smart Boards are interactive touch screens that keep track of the students' daily work. They can show movies, help teach math, reading, science, music, art and more. The Smart Board can also show a variety of digital simulations, including dissecting a frog and with the touch of the screen the frog reacts to the students. Currently, 5 out of 11 classes are using the Smart Boards. The school's goal is to have one in every classroom because they believe the students' education will flourish with the daily use of the electronic interactive Smart Board.

As a Bank of Promise, Community Bank is a strong supporter of educational programs, and believes in investing in the future by investing in the children of the communities they serve. The bank is committed to helping young people reach their goals by providing support for educational programs, athletics and extracurricular activities.
